

From Offroader to Explorer!

There are many ways to enter the Sahara. Desert Navigation techniques equips you for the most exciting and engaging of all.

You own a new 4x4 or want to know how GPS could be used with maps in desert safaris. If that is so, then you need this Navigation course for safer and more pleasurable safaris.

From pre-GPS navigation with sextant and compass to space-age tools and satellite images simplified. It's ideal for busy people who love their freedom in desert safaris and wishes to tackle it with style—Explorers style!

“course & fieldtrip were useful, educational, inspirational and above all, lots of fun.”

-Ahmed Khaled
Network Planning
Director

Sahara Navigators

Maximize your Adventure Pleasure

Designed and delivered by an expert in the subject, this course introduces you to maps (paper and electronic), and the use of compasses and GPS specifically for Desert Safaris and for all levels of experience.

Promoting the understanding of the terrain and ethical approach to environment and local communities, it focuses on techniques to determine positional fix from sextants to GPS, and GPS/map relations. It ends with the planning of expeditions and practical roles of navigators before and during trips with many Explorers-like skills and a lot more.

“very intuitive, interesting and fun. I always thought navigation, compass, GPS....etc, were very complicated and a thing for mathematicians, which I am definitely far from being...I hate numbers. But, this course was so user friendly and lots of fun”

-Joann Chemali

“huge amount of relevant material covered.

Visuals excellent” -Simon Allen, Writer and UK Chartered Surveyor

Concise for Busy People

With its easy format, it covers all essential basic definitions in mapping, geography, and space technology, plus many tricks for the veterans. You'll find it very rich in visual material, with easy-to-understand diagrams, and exciting photos of local geographical forms. It is made up of:

- 3 evening sessions. Lectures are given in professional facilities with tea breaks, real navigation instruments in practical exercise and calculations on real maps
- Day fieldtrip with exercises solving practical problems for hikers and offroaders, in addition to exploring a wonderful canyon near Cairo
